### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 09, 2004 has been entered but are deemed moot because of Restrictions Request below.

2. Claims 1, 4-5, 12, 14, 17-18 and 36-37 are amended. Claims 2-3, 20-28 and 40-42 are canceled. Claim 44 is newly added. The pending claims are 1, 4-19, 29-39 and 43-44.

### ***Election/Restrictions***

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4, 11, 19, 29-39, and 43-44 drawn to a system for spawning process when a file and a directory copy, classified in class 707, subclass 1.

- II. Claims 5-10 and 12-13, drawn to a method for increasing a limit on a resource for copying file, classified in class 711, subclass 2.
- III. Claims 14-18, drawn to a method for sending an e-mail message during copying, classified in class 709, subclass 206.

4. The inventions are distinct, each from the other because of the following reasons: Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for spawning process when a file and a directory copy. Invention II can be used for increasing a limit on a resource for copying file. Invention III can be used for sending an e-mail message during copying. See MPEP 806.05(d).

5. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2172

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143).

8. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
